

2023 CPMF HIGHLIGHTS

The College Performance Measurement Framework (CPMF) is about driving excellence in health profession regulation. Its purpose is to strengthen accountability and oversight of Ontario's health regulatory colleges and help colleges better achieve their public protection mandate.

WHAT WE'VE DONE

Engaged in extensive training on EDI-B and the public interest.

Published a Status Report on our activities related to EDI-B.

Incorporated equity impact into new professional standards of practice for RDs and entry-to-practice policies for applicants.

Partnered with other Canadian dietetic regulators to deliver the national licensing exam and to facilitate the transition to a new educational accreditation provider.

Worked with the College of Occupational Therapists to re-develop our peer and practice assessment tools.

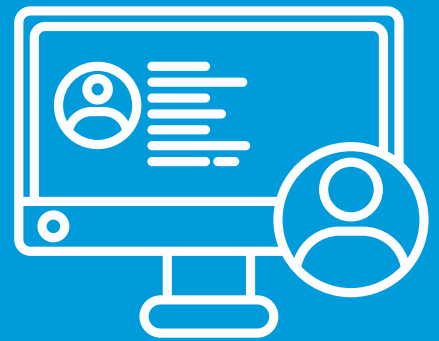

Joined Hub 601 – a multi-regulator workspace hosted by the College of Dental Hygienists of Ontario.

Consulted with the Citizens Advisory Group on draft revisions to the Code of Ethics to address emerging issues in practice and the public perspective.

Consulted with dietitians and other system partners for feedback on the proposed emergency class of registration, proposed revisions to the Code of Ethics and position statement on registration requirements for interjurisdictional practice.

Introduced new standards of practice for RDs related to virtual care and social media that reflect the evolving healthcare landscape.

Strengthen cybersecurity with enhanced software and organization-wide monthly training modules.

Adopted a new meeting minutes template with additional detail about the Board's decision-making, including reasons for the decision, considerations discussed and the public interest rationale.

Approved changes to our governance structure that align with best practices, including adopting a single electoral district, eliminating nominators for electoral applicants and gradually reducing the number of elected Board directors.

HOW WE'RE IMPROVING IN 2024

Screening Board electoral candidates for eligibility using a Competency and Attribute Framework in place for the 2024 election.

Developing a Competency and Attribute Framework for Committee appointments that identifies the knowledge, skills, experience and individual qualities that would best support committee work.

Updating the governance performance evaluation framework to support continuous improvement of the Board and committees.

Providing mental health resources on our website for complainants and registrants to better support those involved in the complaints process.
